Summary

Software Engineer (Backend / Full-Stack) focused on building secure, scalable web applications using **Java 17, Spring Boot 3, REST APIs, and MySQL**. Hands-on with **AWS (EC2, S3)**, Docker-based deployments, and **CI/CD automation (Jenkins/GitHub Actions)**. Strong foundation in **security (JWT, RBAC)**, clean architecture, and cross-functional collaboration.

Technical Skills

Languages	Java, Python, Bash, JavaScript
Backend	Spring Boot 3, Spring Security, REST APIs, JWT, Maven
Databases	MySQL 8, JPA/Hibernate
Frontend	HTML5, CSS3, Vanilla JavaScript (Fetch API)
Cloud & DevOps	AWS (EC2, S3, VPC, IAM), Docker, Docker Compose, Jenkins, GitHub Actions
IaC	Terraform, CloudFormation
Quality/Security	SonarQube, vulnerability scanning, IAM auditing

Experience

AWS Cloud Intern — Technical Hub Pvt Ltd May 2025 – June 2025 | On-site **Internship Letter**

- Configured **VPC networking**, subnets, route tables, and security groups to support **10+ EC2 instances** with high availability.
- Hardened **IAM policies** using least-privilege access patterns, reducing excessive permissions and improving security posture.
- Supported deployment of client-server web workloads on AWS, improving reliability through standardized configurations.

Key Skills: AWS (EC2, VPC, IAM), Networking, Security Basics.

Artificial Intelligence Intern — Infosys Springboard Sep 2025 – Nov 2025 | Remote **Internship Letter**

- Built an AI-driven agricultural assistant and integrated model outputs into backend services for near real-time recommendations.
- Improved inference latency by deploying services on AWS and optimizing the request/response workflow.

Key Skills: Python, Data Analysis, Cloud Integration.

Projects

Student Management System (Full-Stack Web Application) **Source Code**

Tech Stack: Java 17, Spring Boot 3, Spring Security (JWT), MySQL 8, Docker, Jenkins, AWS (EC2, S3)

- Built secure REST APIs with **JWT authentication** and **role-based access control** for student CRUD operations.
- Implemented persistence using **Spring Data JPA** with **MySQL 8** and production-grade validation/error handling.
- Integrated **AWS S3** for profile photo uploads and deployed to **AWS EC2** using **Docker Compose**.
- Automated CI/CD pipeline with **Jenkins** and code quality checks via **SonarQube**.

Hybrid Cloud Infrastructure (GCP & LocalStack) **Source Code**

Tech Stack: Terraform, GCP, LocalStack, Docker, Python

- Provisioned multi-cloud infrastructure with Terraform to automate GCP and AWS (LocalStack) resources.
- Built data migration pipeline from S3 to GCS with optimized transfer performance.
- Deployed Flask microservice to Cloud Run with 99.9% uptime and repeatable IaC patterns.

Education

2023 – Present	B.Tech. (CSE), Aditya College of Engineering and Technology	CGPA: 8.45
2021 – 2023	Class 12th, Narayana Junior College , AP State Board	90.4%

Certifications

GFG Cloud Practitioner	– View
AWS Cloud Developing	– View
AWS Developer Associate	– View
Google Cloud Career Launchpad	– View
